MIRROR CARE

- Use only mild cleaning solutions and a clean, soft, lint-free cloth.
- DO NOT USE cleaners that contain strong solutions of ammonia, vinegar, or chlorine.
- DO NOT USE powdered cleansers or steel wool.
- Never spray cleaning agent directly on mirror, especially on exposed edges and mirror backing. Apply cleaner to soft cloth and wipe mirror. Dry mirror thoroughly.
- Keep mirror dry. A well ventilated bath room is important.

INSTALLATION

1. Carefully remove all packing material. Place shelves and hardware package aside until needed.
2. Determine desired location of cabinet on wall. Mark wall to show wall opening size (see dimension chart). Generally, the recommended height to the center of the cabinet is 64" from the floor. Fig. 1
3. Cut wall opening, being careful not to damage the surrounding wall surface. Wall studs, plumbing or electrical lines that interfere must be removed or relocated. Insert framing to support all plaster board edges.
4. Insert cabinet into wall opening in plumb and centered position. Use a carpenter's level and shim corners of cabinet if necessary. Secure to wall studs through the 4 mounting holes inside cabinet (screws provided).
5. Place shelf brackets at desired height. Place shelves on brackets.
